Position Description
This position will focus on recruiting and assessing the mental health status of adults (ages 35-75) from the community to determine eligibility for a research study that examines the role of motivation and depressive psychopathology in age-related changes in emotion and emotion regulation across adulthood.

Sponsoring Department
Psychological & Brain Sciences

Skills and Qualifications
Bachelor's degree in psychology, social work, or a related field, diagnostic interviewing experience, good communication and organization skills, works well in a team and independently.

Desired Skills
Some graduate schooling or master's degree in psychology, social work, counseling, or related field; experience with the SCID; up to three years of relevant research and/or clinical experience, such as experience working with adult clinical samples.

Primary Responsibilities
• Recruit, screen, and schedule community members from diverse backgrounds and ages
• Administer structured clinical interviews (e.g., Structured Clinical Interview for DSM-5 (SCID))
• Code recorded clinical interviews for quality control and establishing inter-rater reliability
• Participate in the training and supervision of other team members

Compensation & Benefits
$17.93-$26.92

Application Process
Interested applicants should email their CV listing three references as well as a 1-page cover letter describing their interest in the position and relevant expertise to Drs. Renee Thompson (renee.thompson@wustl.edu) and Tammy English (tenglish@wustl.edu).

Application Timeline
The start date is negotiable in summer 2022. Applications will be reviewed on a rolling basis.
